Hi Dominic,

Dennis is staying at the Hampton Inn in Barboursville, WV. If you could plan on meeting him at his hotel tomorrow at 7am and then follow him to the Freedom Industries Site.

Address of the Hampton Inn is 1 Cracker Barrel Dr, Barboursville, WV 25504

The freedom industries address is 1015 Barlow Dr. Charleston, WV and it does come up in GPS.

The current schedule of calls for EPA is 0900 Operations Briefing - where on-site OSCs are expected to update. I usually try to talk to WV DEP prior to this call because they have a staff person on site for oversight for the full 24 hours of operation going on at the site. The second meeting is optional for on-site OSCs it is the environmental unit call - I try to make the call just to get info. on if we need additional sampling of something (Jack Kelly is the Environmental Unit Leader).

Ex. 5 - Deliberative

Since the only task we are assisting WV DEP with is air monitoring, so we have been doing a daily reading around the facility with the FID on the TVA 1000.
